

Helping parents protect their children

Fundraising Opportunity/Internet Safety Presentation

Shuster Solutions works with parents and organizations to help protect children from sexual predators and other online dangers found on the Internet. We focus on three main objectives: 1) Educating parents, 2) protecting our children, and 3) giving back to the community.

To that end, Shuster Solutions is pleased to present a unique fundraising opportunity that accomplishes all three stated goals. At no cost, your group or organization will receive a one hour presentation on the dangers families face on the Internet. A few of the topics addressed include:

- Internet Predators
- The dangers of Myspace.com and other social networking sites
- Identity theft
- Cyber-bullying
- The legal risks to parents if their children download music illegally

As a fundraiser, your parents will have the opportunity to acquire powerful, yet simple to use software that helps make certain their children are safe when online. Some of the features of this Internet monitoring software include:

- MySpace.com activity recording
- Recording of all E-Mail activity (including web mail)
- Instant message chat recording
- Complete computer keystroke recording
- Enhanced website recording and website search listing
- Peer to Peer (illegal file sharing) recording/notification
- Advanced keyword detection with instant email notification
- Internet access control/blocking
- Stealth mode/password protection
- Dependable and responsive technical support

All software is downloaded directly and purchased by interested parents through our secure website. There is no risk or financial commitment for your organization whatsoever. In honoring our third goal, a percentage of sales (based upon the number of parents purchasing software) from this fundraiser will be donated back to your organization or a charity/foundation of your choosing. This charitable contribution not only generates revenue for your organization, but it allows Shuster Solutions to truly give back to the community.
